DETAILED ACTION

Status of the Application

This Office Action is in response to Interview Summary filed on 11/16/2010.

Claim(s) 1-11 have been cancelled. Claim(s) 12-22 are pending and examined herein.

Applicant's arguments have been fully considered and found persuasive to withdraw the 103(a) rejection over Barbier (US Patent 5,488,041) in view of Huber et al. (US Patent 3,637,641).

Also, in light of the abandonment of Application No. 11/406,296, the corresponding obviousness double patenting rejection is hereby withdrawn.

Claims 12-22 are free of the prior art and in condition for allowance.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The closest prior art is a 103(a) rejection over Barbier (US Patent 5,488,041) in view of Huber et al. (US Patent 3,637,641). The instant claims are drawn to a method of treating osteoarthritis-induced lameness in a non-human animal suffering from osteoarthritis and not suffering from fractures. The disorder, osteoarthritis, is caused by degradation of the cartilage in a joint leading to bone rubbing on bone, which causes bone spurs or growths. The instant invention is not concerned with repairing bone fractures. Barbier is directed to a method of treating bone disorders, particularly from fractures or surgeries. The secondary reference, Huber, is directed to a method of treating bony exostosis, which is abnormal bony growth, thus teaching away from

combining with Barbier's teachings since one deals with promoting bone growth and the other deals with inhibiting bone growth. Nonetheless, the instant invention is directed to treating the cartilage tissue and not the bone.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
